Vantec Europe Achieves ISO 27001:2022 Certification for Information Security Management

We are proud to announce that **Vantec Europe (VEU)** has been recommended for certification to **BS EN ISO 27001:2022** by the **British Standards Institute (BSI)**, following a successful audit.

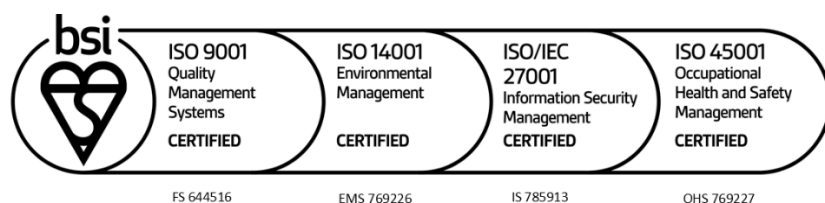

This internationally recognised certification reflects our commitment to maintaining the highest standards in **Information Security Management**. The audit focused on evaluating our processes and standards across indirect areas, ensuring that our infrastructure aligns with global best practices.

Achieving ISO 27001 assures our customers, partners, and stakeholders that VEU's approach to information security is robust, reliable, and continuously improving. It complements our existing certifications in:

- **Quality Management (ISO 9001)**
- **Environmental Management (ISO 14001)**
- **Occupational Health and Safety Management (ISO 45001)**

Together, these certifications strengthen our business portfolio and reinforce our dedication to excellence across all areas of operation.

Thank you to our **IT, Compliance, and Governance Teams**, and to everyone across the business who contributed to this achievement. Your dedication and teamwork continue to drive Vantec forward.
