Vantec Make The Switch

Vantec Europe Limited, for the last 6 months has been one of the many firms taking part in the 'Switch EV' trial, which allows businesses the use of a ground breaking all-electric vehicle. In Vantec's case, we have had the pleasure of experiencing the Nissan Leaf, and even getting its very own charging post installed at the Vantec Head Office in Cherry Blossom Way.

Over the time of the trial the Nissan Leaf has been used as a company car as well as a pool vehicle for staff. It is fair to say that it has made a big impact on the staff here, so much so, that Vantec have bought one of their own.

Neil Gibson, Senior Manager of Support Services, commented on the Leaf 'This car provides an excellent option for our business use and will be a good addition to our fleet. Investment in electric vehicles is also part of our strategic direction with Nissan and our parent company so this is an excellent move all round.'

The new electric Leaf will be used as a pool car for the company and has already been proudly branded with the company's newly designed livery, along with a fleet of trucks and vans.
